PROFILE

Self-driven and enthusiastic software developer with a strong foundation in Python and Django. Experienced in building real-world web applications including donation platforms, blogs, and API-driven services. Passionate about solving problems with clean code and modern web technologies like Django REST Framework, JavaScript, and Tailwind CSS. Always eager to learn, collaborate, and create solutions that make a real impact.

PROJECT EXPERIENCE

Blessed Foundation

2025 - PRESENT

Backend Developer

- Built the entire backend o a charity donation platform using Django and Django REST Framework
- Implemented donation tracking, campaign creation, mobile money support, and WhatsApp integration
- Structured REST APIs for frontend consumption using Next.js
- Designed models and views to support real-time campaign updates and admin uploads

2025 - 2029

AdombirePress (Blog Platform)

Full Stack Developer

- Developed a blog platform with user authentication, categories, post management, likes, comments, and search
- Used Django for the backend and Bootstrap for responsive frontend layout
- Enabled image uploads and post pagination with admin controls

Weather Forecast App

Frontend + API Integration Developer

- Built a Django-based app that fetches real-time weather data using OpenWeatherMap API
- Added features like rain/snow animations and graphical weather analytics
- Ensured city-based weather retrieval with a user-friendly UI
